Annual Report 2012

Fiscal Year Ended March 31, 2012

Overview (As of March 31, 2012)

Official Name SUMITOMO LIFE

INSURANCE COMPANY

Established May 1907

Location

Head Office: 1-4-35, Shiromi, Chuo-ku, Osaka 540-8512, Japan Tokyo Head Office: 7-18-24, Tsukiji, Chuo-ku, Tokyo 104-8430, Japan

President and CEO
Number of Employees

Yoshio Sato 42,953

(11,497 administrative;

31,456 sales)

Sales Offices

71 branch offices; 1,567 district offices

Total Assets

¥23.9 trillion (\$291.5 billion)

Policies in Force:

Individual life insurance Individual annuities Group insurance Group annuities ¥102.7 trillion (\$1,249.9 billion) ¥13.4 trillion (\$163.6 billion) ¥32.3 trillion (\$393.8 billion) ¥2.4 trillion (\$29.9 billion)

Note: U.S. dollar amounts are converted at US\$1.00 = ¥82.19, the rate prevailing on March 31, 2012.

History

The head office building of Hinode Life completed in December 1913

May 1907	Incorporated as Hinode Life Insurance Co., Ltd.
May 1926	Name changed to Sumitomo Life Insurance Co., Ltd. following acquisi- tion by Sumitomo Goshi (joint-stock) Company.
March 1948	All assets and liabilities were transferred to Kokumin Life Insurance Co. after the General Headquarters dismantled large Japanese conglomerates including "Sumitomo".
June 1952	Name changed to Sumitomo Life Insurance Company.
November 2005	Established PICC Life Insurance Co., Ltd. in China with The People's Insurance Company (Group) of China Limited.
April 2010	Established Medicare Life Insurance Co., Ltd. as a life insurance subsidiary.

Management Policy

- 1. Based upon the concepts of coexistence, co-prosperity and mutual support, we strive to strengthen and expand our business, while contributing to the advancement of social and public welfare.
- 2. Creditworthiness and steadiness will be the foundation for the execution of our business.
- 3. We will always remain composed in judgment and retain a progressive and indomitable spirit, responding to changes in our environment and keeping abreast of the times.

^{* 1.} Core business profit excluding the impact of standard policy reserves concerning the minimum guarantees for variable annuities.

Notes: 1. U.S. dollar amounts are converted at US1.00 = 482.19 = 6.2943 yuan, the rate prevailing on March 31, 2012.

2. Amounts of less than 0.1 billion yen or less than 0.1 billion dollars have been truncated.

^{*2.} Accumulated retained surplus is the total of the fund for price fluctuation allowance, accumulated redeemed foundation funds, and the reserve for redemption of foundation funds on the net assets section plus the contingency reserves and the reserve for price fluctuations on the liabilities section.

^{* 3.} New solvency margin regulations with a higher and more precise risk weight have been applied since March 31, 2012. The new solvency margin ratio is shown along with the previous regulations for fiscal 2010.

Yoshio SatoPresident and Chief Executive Officer

Commencing Our New
Corporate Brand Project
Based on Our Belief in
the Importance of Life
Insurance and Our
Significant Responsibilities
as an Insurance Company

The Great East Japan Earthquake, which struck in March 2011, made us realize the necessity of life insurance and the important responsibilities we bear as a life insurance company.

Approximately 300,000 of our policyholders lived in the disaster stricken region. Over the past year, our local sales representatives as well as head office staff tried to visit and contact each of them to confirm their whereabouts. We paid claims and benefits quickly while paying attention to the feelings of their families. In addition, we actively supported our policyholders during the difficult aftermath of the disasters by extending insurance premium payment periods and other measures. Through these actions in particular, we have been reminded of the importance of face-to-face services and the significant

responsibilities we owe to our policyholders.

Under these circumstances, we commenced a new corporate brand project expressed in the slogan "Empowering your future," which is intended to express our mission to protect and support the lives of our policyholders and their families. Rather than a simple brand strategy, this project is meant to reform our services and operations by changing our employees' ways of thinking and acting.

To achieve our new brand vision, we launched our latest three-year management plan "Sumitomo Life Medium-Term Program" in fiscal 2011 (the year ended March 31, 2012). We have been carrying out action plans this year including revival after disaster plans and plans for reinforcing our sales and services systems.

Securing Sustainable Growth in a Stagnant Economy

Performance

Reviewing fiscal 2011 non-consolidated performance, our annualized premiums from policies in force for individual life insurance and annuities rose 0.2% to ¥2,187.5 billion (\$26.6 billion), increasing for the seventh consecutive year. Annualized premiums from new policies for individual life insurance and annuities fell 22.0% to ¥139.4 billion (\$1.6 billion), mainly due to our efforts to control the sales volume of low-margin single-premium whole life policies through the bancassurance network. As a result, we have achieved a more profitable policy portfolio, with the value of new business increasing 13.4% to ¥177.7 billion (\$2.1 billion).

Annualized premiums for surrendered and lapsed policies decreased 9.0% to ¥89.0 billion (\$1.0 billion), improving for the ninth consecutive year, largely due to the increased efforts of our 30,000 sales representatives who regularly visit existing policyholders.

With this solid performance from insurance operations, we continued to achieve stable profits, and posted adjusted core business profits* of ¥328.0 billion (\$3.9 billion). Accumulated retained surplus surpassed the ¥1 trillion mark (\$12.1 billion).

Asset Management and Financial Strength

We follow an Asset-Liability Management (ALM) framework as our basic policy, investing

mainly in ven-denominated interest-bearing assets to secure stable earnings over the medium- to long-term. We control overall interest rate risks from assets and liabilities as appropriate mainly by increasing the balance of super-longterm bonds to correspond with the long-term liabilities typical of life insurance policies. In addition, we manage investments in foreign currency denominated foreign bonds by controlling currency risk with a full foreign exchange risk hedge on the principal of these investments. We have also limited the impact from equity and real estate declines by decreasing our exposure to these markets. As of March 31, 2012, we held no government bonds issued by the GIIPS countries*.

Japan is likely to introduce economic value-based solvency margin regulation in the near future. In anticipation of this future regulation, we have implemented economic value-based integrated risk management. Under this advanced risk management, we have reduced our exposure to stocks and other risky assets while increasing accumulated retained surplus. In addition, we have decreased our overall reliance on external financing, while at the same time we have replaced a portion of our existing external financing with higher tier debt, thereby reinforcing our already sound capital base.

European Embedded Value (EEV)

As a result of our efforts in the areas of sales, services, asset management and risk management, our EEV increased 17.7% to ¥2,318.5 billion (\$28.2 billion). Amid deteriorating economic conditions including low interest rates,

we have been able to maintain sustainable growth by securing new business and reducing our expense ratio as well as our surrender and lapse rates.

^{*}Adjusted core business profits: Core business profit excluding the impact of standard policy reserves concerning the minimum guarantees for variable annuities

Penetrating Growth Markets as an Industry Leader

Japan, with its long life expectancy and a rapidly growing elderly population, now has the world's "greyest" population. This is creating a major new market as life insurance needs shift from mortality coverage, designed to support bereaved families, to products designed to pay benefits during the lives of the customers. We proactively offer coverage that extends beyond mortality to include morbidity and longevity. Specifically, we are focusing on nursing care, medical insurance and retirement planning as three growth areas in Japan, and we are exploring these areas with our unique "multi-channel, multi-product" strategy.

Sumitomo Life's sales channels are underpinned by our network of 30,000 sales representatives who have specialized knowledge and excel in face-to-face consultation with customers. This network is our most effective sales channel and can identify unmet customer needs for nursing care and medical insurance coverage. In fiscal 2011, annualized nursing care and medical insurance premiums increased 0.8% to ¥504.1 billion (\$6.1 billion), increasing for the ninth consecutive year. This growth is the result of the strong consulting abilities of our sales representatives and the regular contact they maintain with our seven million existing policyholders, as well as the introduction of advanced new products that augment nursing care and medical coverage.

Moreover, we are upgrading systems to offer services to policyholders with greater accuracy and speed. In addition, we are also strengthening the consulting services provided by our call centers. We are striving to improve the quality of our services through these measures along with the direct services offered by our sales representatives.

Banks, with total deposits of ¥600 trillion (\$7.3 trillion) and broad customer base, are the most effective channel for developing the retirement planning market. We are continuing to

develop our bancassurance network, which ranks as the industry's largest with over 300 participating banks and financial institutions. Our bancassurance network is developing into a sales channel that can sell not only savings-type products but also more protection-oriented products. In turn, we are expanding to sell more protection-oriented and highly profitable life insurance products through the network.

We are also responding to the growing number of customers who compare multiple life insurance products using such new channels as insurance outlets and the Internet. In light of the changing environment, we launched Medicare Life Insurance Co., Ltd. in April 2010, as the first life insurance subsidiary of a major Japanese life insurance company to provide simple and affordable life insurance through these emerging channels. The multi-product strategy undertaken by Sumitomo Life and Medicare Life Insurance has continued to enjoy steady success over two consecutive years, with Medicare Life's new policies increasing 3.5 times year on year to 29,000 in fiscal 2011.

In our overseas business, China-based PICC Life Insurance Company, which we established with The People's Insurance Company (Group) of China Limited, has rapidly expanded its business by leveraging PICC's strong brand and by accelerating the expansion of its branch network. In its sixth year, fiscal 2011, PICC Life generated premium income of 70.3 billion yuan (\$11.1 billion) and is now the fifth largest among the 60 life insurance companies in China, carrying a 7.4% market share. PICC Life posted a profit in fiscal 2011 for the third consecutive year and is growing at a pace that has allowed it to erase its accumulated losses by fiscal 2011.

Along with efforts to exploit domestic growth areas, we will continue to focus on overseas markets, especially high-growth potential countries in Asia, as a driver for our sustainable growth.

Realizing Our Brand Vision

Fiscal 2012 is the second year of the Sumitomo Life Medium-Term Program.

Under our new corporate brand, we will enhance consulting and services for our policyholders, promote the "multi-channel, multi-product" strategy and expand life insurance businesses overseas. We will promote and augment these and other initiatives with the aim of becoming a company that helps policyholders to empower their futures.

I thank you for your continued support.

Yoshio Sato

President and Chief Executive Officer

yoshio Sato

Brand Vision

We have declared the achievement of "Four Advanced Values" as our goal to empower the future of our customers.

By providing these values to each of our customers through the ongoing efforts of all of our executives and employees, we hope to distinguish the uniqueness and prominence of our services. We are sure that by continuing to thoroughly provide these values we will be able to increase the loyalty of our customers.

We have created the catchphrase, "empowering your future" to convey the "Four Advanced Values" concept to our customers. By directly addressing customer concerns, we hope to help protect and support our customers and their families as they plan for and move beyond life's challenges. In other words, we are "empowering your future." We will do our utmost to fully realize this concept, which, we believe, should form the basis of all life insurance businesses.

Brand Vision: "Four Advanced Values"

Consistently and continuously provide advanced consulting and services

Beyond providing easy-to-understand and polite consulting upon the initial purchase of life insurance, we seek to offer precise, ongoing consulting and other services to realize appropriate coverage at each stage of a customer's life.

Offer advanced products to enable customers to live vigorously

We develop and offer advanced products that respond to our customers' current and also expected future needs in areas focusing on nursing care, medical insurance and retirement planning.

Sumitomo Life is "Empowering your future"

Aim at achieving impressive customer service that always exceeds customers' expectations

We aim to provide convenient, high-quality services in all areas with a level of warmth and empathy found nowhere else

Realize an evolving support program to encourage a "healthy life" and "rich and happy golden years"

We seek to realize a new support program based on areas closely associated with the insurance business, including nursing care and health, social insurance and asset planning consultation services.

Individual Life Insurance and Annuities

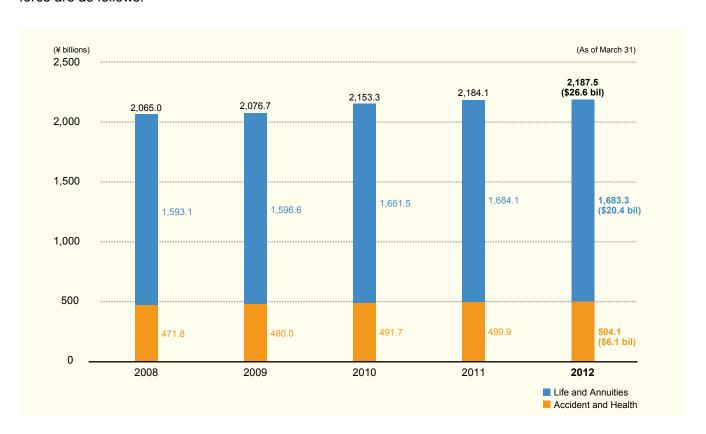

The annualized premium of individual life insurance and annuities in force increased from the previous fiscal year, the seventh consecutive year-over-year increase. We maintained sustainable growth while promoting the shift to highly profitable product portfolios.

Annualized Premium of Policies in Force

In the fiscal year ended March 31, 2012, the annualized premium of policies in force for individual life insurance and annuities rose 0.2% to ¥2,187.5 billion (\$26.6 billion), increasing for the seventh consecutive year. The annualized premium of policies in force for Accident and Health insurance products such as nursing care and medical insurance rose 0.8% to ¥504.1 billion (\$6.1 billion), increasing for the ninth consecutive year.

The two main reasons for this consecutive increase of the annualized premium of policies in force are as follows:

- We have achieved steady results through channel diversification in three growing markets (nursing care, medical insurance and retirement planning), which are expanding along with the advent of a long-lived society.
- We have increased our efforts to reduce the surrenders and lapses of existing policies. This has been achieved through our sales representatives maintaining frequent contact with customers, while making efforts to provide exceptional customer service.

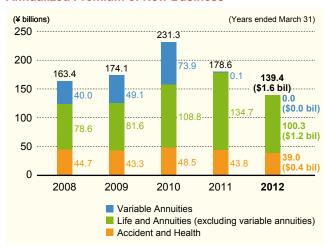

Annualized Premium of New Business

The annualized premium of new business for individual life insurance and annuities totaled ¥139.4 billion (\$1.6 billion), down 22.0% from the previous fiscal year. This decrease was due to intentionally controlling the sales volume of single-premium insurance via our bancassurance network.

Regarding the bancassurance network, while

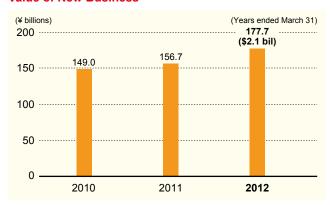

Annualized Premium of New Business

controlling the sales volume of single-premium insurance, we promoted the shift to highly profitable product portfolios.

As a result, the value of new business increased 13.4% to ¥177.7 billion (\$2.1 billion) despite a 22.0% decrease in the annualized premium of new businesses.

Value of New Business

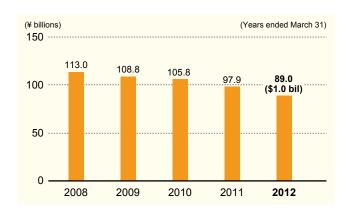

Annualized Premium of Surrendered and Lapsed Policies

The annualized premium of surrendered and lapsed policies decreased 9.0% to ¥89.0 billion (\$1.0 billion).

Sumitomo Life encourages sales representatives to maintain regular contact with existing policyholders and provide services throughout their lives. This reflects the management policy that seven million existing policyholders form an irreplaceable business platform for us. In order to promote regular contact we provide measures such as system investments to enable easier follow-ups with existing policyholders and sales-representative incentives, which put an emphasis on policy retention.

This steadfast attention to customer follow-up

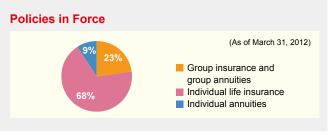

has helped us achieve nine consecutive years of improvement.

■Group Insurance and Group Annuities

The total of the individual life insurance, individual annuities, group insurance and group annuities in force is ¥151.0 trillion (\$1,837.3 billion).

Group insurance and group annuities account for ¥34.8 trillion (\$423.8 billion), or 23% of the total, representing our well-balanced business portfolio.

Operating Results

Economic conditions remain severe due to such factors as a slowdown of overseas economies sparked by the European debt crisis as well as persistently low interest rates and the weak stock market in Japan. Against this backdrop, adjusted core business profit for the fiscal year under review grew steadily to \$3.9 billion).

Core Business Profit

Core business profit is an indicator of the earnings strength of Japan's life insurance companies.

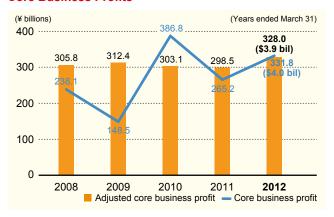

In fiscal 2011, Sumitomo Life's core business profit increased 25.1% to ¥331.8 billion (\$4.0 billion). Adjusted core business profit, which excludes the provision and reversal of reserves to cover the minimum guarantees for variable annuities to measure fundamental profitability, increased 9.9% year-over-year to ¥328.0 billion (\$3.9 billion).

Negative spread fell by ¥7.7 billion (\$0.09 billion) to the controllable level of ¥66.9 billion (\$0.8 billion).

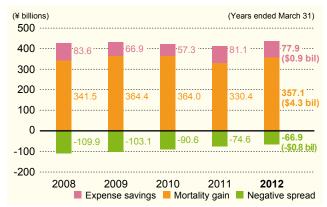

Negative spread, which we started to disclose in fiscal 2000, has improved for 11 consecutive years for two reasons:

- Assumed interest rates on policies in force are declining because older policies with higher assumed interest rates are maturing. Therefore, the percentage of policies with lower assumed interest rates is increasing.
- We have been allocating additional policy reserves to individual annuities at the commencement of new annuity payments by applying the latest standard calculation rates, thus lowering the average assumed interest rate.

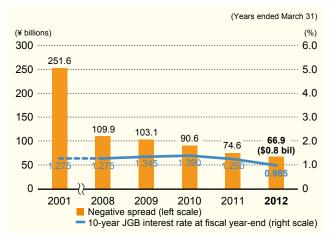

Core Business Profits

Sources of Profits

Negative Spread

Financial Strength

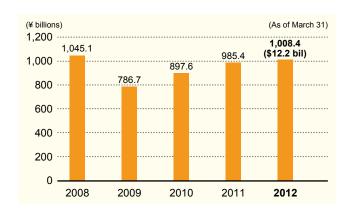

We boosted accumulated retained surplus to \$1,008.4 billion (\$12.2 billion) and recorded a sound solvency margin ratio of 708.6%.

Accumulated Retained Surplus

Accumulated retained surplus stood at ¥1,008.4 billion (\$12.2 billion), nearly the same amount recorded prior to the 2008 financial crisis.

During the fiscal year under review, a one-time charge of ¥40.3 billion (\$0.4 billion) was incurred for the reduction of deferred income tax assets due to the impact of lower corporate tax rates beginning in fiscal 2012. Supported by stable earnings, however, we were still able to accumulate a surplus of ¥23.0 billion (\$0.2 billion) in fiscal 2011, even after accounting for this one-time event.

We will continue to reinforce our long-term financial strength by accumulating surplus while considering the distribution of dividends to policyholders.

Capital Policies

In line with economic value-based solvency margin regulations expected to be introduced in the future, we have been working to augment equity capital mainly by focusing on accumulating surplus and also through supplemental external financing.

Regarding external financing in fiscal 2011, we repaid subordinated fixed-term loans of ¥50 billion

(\$0.6 billion) before maturity and redeemed ¥90 billion (\$1.0 billion) in foundation funds, as we raised foundation funds totaling ¥100 billion (\$1.2 billion). As a result, we decreased the balance of external financing as we take steps to build a higher capital base.

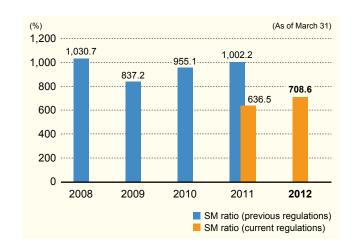

Solvency Margin Ratio

The solvency margin ratio is the ratio of total solvency margin to total risk amount, which quantifies various risks.

New solvency margin regulations with a higher and more precise risk weight and a stricter requirement for external financing to be counted in the solvency margin were introduced in Japan on March 31, 2012.

In the fiscal year ended March 31, 2012, our solvency margin ratio rose from 636.5% to 708.6%. The ratio has far exceeded 200%, a level which requires administrative intervention in Japan.

In Japan economic value-based solvency margin regulations, similar to the Solvency II Framework scheduled to be introduced in Europe, are under consideration for implementation. In anticipation, we have been decreasing risk and securing accumulated retained surplus.

Dividends to Policyholders

Maintaining a medium- to long-term perspective, we pay stable dividends to policyholders while maintaining a sufficient level of accumulated retained surplus to withstand downside risk.

In fiscal 2011, we were able to maintain stable

performance and increase retained surplus. Accordingly, we maintained the same level of policyholder dividends as in the prior fiscal year, distributing dividends of ¥63.3 billion (\$0.7 billion).

Financial Strength Ratings

As of the end of July 2012, we have received a rating of A2 from Moody's; an A- from Standard & Poor's (S&P); and an A from Fitch Ratings (Fitch), Rating and Investment Information (R&I), and Japan Credit Rating Agency (JCR): receiving an A level rating from all the rating agencies.

In October 2011, Fitch upgraded Sumitomo Life's rating one level to A. This was attributable to Sumitomo Life's efforts to strengthen its financial base through accumulated retained surplus and reduce risky assets.

Rating Status	As of July 31, 2012
Moody's	A2
S&P	A-
Fitch	A
R&I	A
JCR	Α

European Embedded Value (EEV)

Amid deteriorating economic conditions, EEV increased \$348.9 billion (\$4.2 billion) to \$2,318.5 billion (\$28.2 billion) because of management's efforts to secure new business, reduce the expense ratio and reduce surrenders and lapses.

European Embedded Value (EEV)

EEV increased ± 348.9 billion (\$4.2 billion) to $\pm 2,318.5$ billion (\$28.2 billion) at the end of fiscal 2011.

Factors for this increase include management's efforts to secure new business, reduce the expense ratio, and reduce surrenders and lapses in light of such deteriorating economic conditions as lower interest rates and the weak stock market.

Value of new business increased 13.4% to ¥177.7 billion (\$2.1 billion) at the end of fiscal 2011, which is continuously contributing to the increase of our EEV.

New business margin, the ratio of new business value to the present value of future premium income (not the annualized premium), increased noticeably by 2.5 percentage points to 9.4%, mainly due to the promotion of a shift to highly profitable product portfolios.

We will continue to focus on sustainable growth of our EEV by expanding the value of new business, decreasing the number of surrendered and lapsed policies, improving our operating efficiency, and promoting ALM.

	Billions of yen (Billions of U.S. dollars)					
Years ended March 31	2012	2011	Change (%)			
Value of new business (A)	¥177.7 (\$2.1)	¥156.7	+13.4%			
Present value of premium income (B)*	¥1,897.3 (\$23.0)	¥2,291.0	-17.2%			
New business margin (A / B)	9.4%	6.8%	+2.5			

^{*} Future premium income discounted by the risk-free rate

Asset Management (General Account)

Our investment strategy is based on an Asset-Liability Management (ALM) framework. We strive to secure stable returns over the medium to long term by investing primarily in yen-denominated interest-bearing assets.

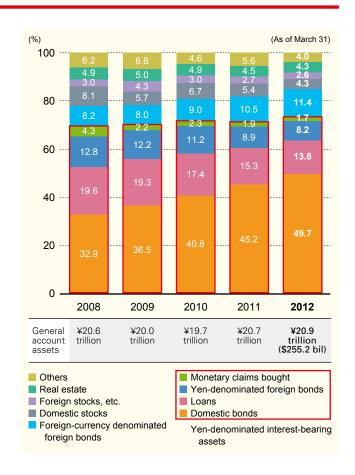

Asset Management

We have an ALM framework as our investment policy regarding general accounts from the perspective of the nature of life insurance business, which typically owns long-term liabilities.

We implement conservative asset management by investing mainly in low credit risk yendenominated interest-bearing assets to secure stable earnings over the medium- to long-term periods.

Our investments in foreign currency denominated foreign bonds are limited to government bonds of countries with high credit ratings and other low credit risk instruments. In fiscal 2011, the currency risk was controlled with a full foreign exchange risk hedge on the principal of these investments.

We also limit the impact from stock price declines as we decreased our exposure to stocks.

Bonds |

In line with our ALM strategy, we strive to accumulate yen-denominated interest-bearing assets, especially policy-reserve-matching bonds.

In addition, we promote ALM and lengthen asset duration by investing in super-long-term bonds. This allows us to better match the duration

of long-term liabilities.

Our investment focus on high rated bonds is demonstrated by the fact that substantially all bond holdings are rated A or higher. We do not hold any bonds issued by the governments of Greece, Italy, Ireland, Portugal or Spain.

Domestic Stocks

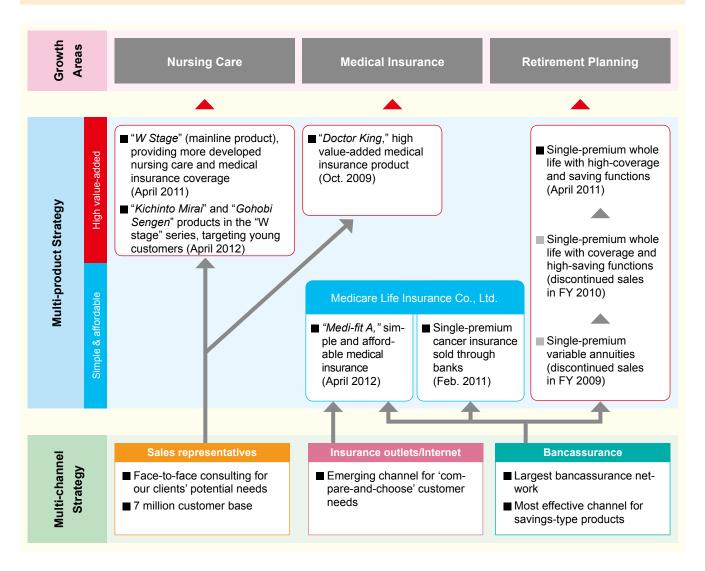

During fiscal 2011, the outstanding balance of domestic stocks was reduced by ¥244.3 billion (\$2.9 billion) on a book value basis. Domestic stocks now account for ¥906.8 billion (\$11.0 billion)

and 4.3% of the general account in the balance sheet, the lowest level among Japan's leading life insurance companies.

Multi-Channel, Multi-Product Strategy

To achieve sustainable growth, in addition to the traditional mortality insurance field, we must actively develop the growth areas of nursing care, medical insurance and retirement planning, which will grow along with the advent of a long-lived society.

We are marketing products that meet these needs through our sales representatives as well as through our bancassurance network involving banks and the Japan Post Group. In addition, our subsidiary, Medicare Life Insurance Co., Ltd., offers a different brand of life insurance that provides simple and affordable products through insurance outlets, the Internet and bancassurance. Thus, we vigorously strive to develop these growing fields through our unique "multi-channel, multi-product" strategies.

Sales Representatives

Our primary sales channel includes over 30,000 full-time sales representatives. This professional specialist staff boasts an average 13-year experience. Our sales representatives, along with their strong consulting abilities, will be the most effective channel to develop the growing fields of nursing care and medical insurance, as the channel can identify unmet customer needs.

With 10 million policies in force covering seven million existing policyholders, our sales representative network benefits from the solid foundation provided by our customer base. This existing customer base can be used as a launching pad for sales initiatives which propose additional insurance and reviews of current policies.

From this perspective, we encourage sales representatives to meet customers more often through system investments which enable easier customer follow-ups and stronger incentive scheme for sales representatives to increase the frequency of contact with policyholders. In sales representative recruitment, we have shifted to recruiting sales representatives on a quarterly basis rather than monthly hiring undertaken by other large insurance companies since determining excellence among employees takes time. We are also working to strengthen the consulting ability of our sales representative channel by reinforcing personnel training programs.

These efforts have been proven effective in successfully strengthening our sales representative channel, as demonstrated by the consistent improvements in our sales representative retention rate and insurance policy persistency rate.

We are now reinforcing our approach to the growing fields of nursing care and medical insurance with the April 2010 launch of "W Stage," which provides more comprehensive nursing care and medical insurance coverage. In addition, we have developed strategic plans for young customers in "W Stage" series.

Sumitomo Life's sales representative channel provides wider insurance coverage to customers by offering property-casualty insurance in addition to life insurance. Our property-casualty insurance business is commission-driven, rather than underwriting based. We offer select products of Mitsui Sumitomo Insurance Company, Limited, a major Japanese non-life insurance company.

As an agent of Mitsui Sumitomo Insurance, annualized premium for property-casualty insurance sold increased 9.7% to ¥44.2 billion (\$0.5 billion). We are creating multiple profit sources through the transaction fees gained from this business. Moreover, we are working to expand and strengthen our life insurance customer-base by offering additional property-casualty insurance coverage.

Bancassurance

The "retirement planning" market of annuities and other savings-type products for a comfortable and worry-free post-retirement life is projected to grow with the advent of a long-lived society. Banks, with total deposits of ¥600 trillion (\$7.3 trillion) and a broad customer base, are the most effective channels for developing this market.

We sell our products via our network of more than 300 banks and financial institutions, the largest bancassurance network of any domestic life insurer.

While controlling the sales volume of singlepremium whole life insurance policies, we have been shifting our focus to more protection-oriented and profitable products. As a result, new policy premium income was ¥438.1 billion (\$5.3 billion).

In addition, annualized premium of new business of level premium products, centered on level premium whole life with additional nursing care coverage, increased 126% year on year.

Thus, our bancassurance network is gradually evolving into a channel that can sell not only savings-type products but also more protection-oriented and highly profitable life insurance products.

Japan Post Group

Privatized in October 2007, the Japan Post Group is an attractive sales channel, with the country's largest network of over 20,000 branches. We have built close relationships with the Japan Post Group. We presently provide multiple products to Japan Post Network Co., Ltd. and Japan Post Insurance Co., Ltd. We have established a

superior position with Japan Post, where the number of branches handling our products is the largest among all life insurance companies.

We will continue to focus on retaining our superior position on the sales via the Japan Post Group and expanding this sales network.

Medicare Life Insurance Co., Ltd.

In Japan, a growing number of customers prefer to select insurance products after comparing them with other insurance products. Insurance outlets, which offer suitable products of multiple insurance companies for each customer, have been increasing nationwide to meet this change in customer needs.

We responded to these emerging needs by launching our life insurance subsidiary, Medicare Life Insurance Co., Ltd. in April 2010 to provide competitive, simple and affordable insurance products through insurance outlets and the Internet, under another brand distinct from Sumitomo Life.

Moreover, Medicare Life Insurance Co., Ltd.

launched a new single-premium cancer insurance in February 2011, and offered level premium term type medical insurance in May 2012 through the bancassurance network in order to meet medical and cancer needs.

Medicare Life experienced a solid increase in performance in fiscal 2011, its second year of operation, with the number of new policies jumping 255% to 29,000, and premium income surging 593% to ¥50.4 billion (\$0.6 billion). In addition, Medicare Life is working to further improve its competitiveness based on upgrades made to its mainstay medical insurance in April 2012.

Overseas Operations

Along with efforts to develop domestic growth areas, we have focused on overseas operations.

Asia ·

In November 2005, we established PICC Life Insurance Company in partnership with The People's Insurance Company (Group) of China Limited. Sumitomo Life presently owns 10% of PICC Life as a strategic partner.

PICC Life operates 34 branches in 29 provinces and autonomous regions of China. The Company has branches in 95% of Chinese cities nationwide.

PICC Life's premium income in the year ended December 2011 totaled 70.3 billion yuan (\$11.1 billion). PICC Life had a 7.4% share of the domestic life insurance market, placing the Company in the fifth position among China's 60 life insurance companies.

In its sixth year, fiscal 2011, PICC Life earned 0.5 billion yuan (\$0.08 billion) in profits, posting a

profit for the third consecutive year and eliminating its accumulated losses.

On the other hand, we have postponed the launch of a life insurance business with Vietnam Bank for Agriculture and Rural Development, Vietnam's largest state-owned commercial bank, in light of severe economic conditions in Vietnam, including persistently high inflation rates. Despite this, we have established a representative office in Hanoi in order to better gather information and investigate various business expansion possibilities in Vietnam.

We would like to realize sustainable growth by capturing the high growth potential of the Asian life insurance market, making use of the accumulated experience and performance of PICC Life.

North America -

We established a wholly owned U.S. subsidiary, Sumitomo Life Insurance Agency America, Inc. (SLIA) in 1986. SLIA has been accommodating the needs of Japanese companies with U.S. operations for 26 years. SLIA provides brokerage and consulting services for employee benefit plans

(group health insurance, etc.) to over 400 companies nationwide. The Company maintains offices in New York, Los Angeles, Atlanta, Chicago, Kentucky, South Carolina and Ohio, and is one of the largest Japanese brokers of employee benefit plans in the United States.

Representative Offices

Having established overseas representative offices in New York, London, Beijing and Hanoi, we are able to gather a broad range of information concerning overseas finance, securities and insur-

ance businesses, which is used to perform research related to potential overseas development and expand insurance businesses in Japan and abroad.

In Japan, introduction of economic valuebased solvency margin regulations are under consideration by the regulator.

In anticipation of future introduction of the economic value-based solvency margin regulations, we have implemented an economic value-based integrated risk management and have become the first mutual company in Japan to disclose EEV.

Our integrated risk management system is an advanced methodology that anticipates economic

value-based solvency margin regulations, reflecting the Solvency II Framework scheduled to be introduced in Europe. In addition, we analyze profit and risk on a per product and business line basis through Enterprise Risk Management (ERM).

We are further upgrading our ERM framework to use as an effective tool that contributes to management's strategic decision making.

Governance

As a mutual insurance company, each holder of a participating policy has a right similar to that of a company shareholder.

At the Annual Board of Policyholder Representatives Meeting, policyholder representatives (the fixed number is 180) elected by our policyholders make decisions on important matters, including the appropriation of the Company's net surplus, changes to the articles of incorporation, and the appointment of directors and auditors.

Three external directors have been appointed as members of the Board of Directors. To secure independence, the majority of our auditors are also external auditors.

The Corporate Governance Committee, headed by one of the external directors, allows for an

outsider's perspective in its deliberation of issues related to the appointment of directors and executive officers, remuneration for executive officers, and the enhancement of internal control systems.

In fiscal 2011, we also held 88 Policyholder Dialogues at branches throughout Japan for executives to listen directly to the opinions of policyholders and reflect those opinions in company management.

Additionally, the Board of Councilors, a body of academic experts and policyholders elected at the Annual Board of Policyholder Representatives Meeting to discuss important business issues, meets three times each year so that those opinions will be reflected in company management.

We believe that contributing to society is one of our most important management priorities.

Specifically, we are advancing social contribution activities primarily around the themes of "measures addressing the declining birthrate and support for child raising," "nursing care and medical care," "the promotion of arts and culture," and "global environmental conservation," considering the affinity of these activities with the life insurance business.

Pink Ribbon Campaign

We support the Pink Ribbon Campaign which educates the public on the importance of the early detection and treatment of breast cancer. Our 30,000 sales representatives nationwide wear pink ribbons, explain the campaign to customers, and promote breast cancer screening.

Charity Concerts

In the promotion of arts and culture, we have regularly hosted charity concerts throughout Japan since 1986. To date, we have held a total of 949 charity concerts attended by more than 1.18 million people. The funds raised by these concerts are donated to welfare facilities around Japan, and to international NGOs for the construction of school buildings in Thailand and Vietnam.

Charity Concert

Children's Drawing Contests

Since 1977, we have also organized international children's drawing contests for the healthy growth of children. Over 9.97 million works have been received since the start of this program. The winning works have been exhibited at the Louvre Museum in Paris every year since 2000, inspiring the dreams of children. In fiscal 2011, we collaborated with the Louvre Museum to hold a special exhibition of drawings created by children living in areas that were severely damaged by the Great

East Japan Earthquake. Through these efforts, we are helping to support the dreams of children everywhere, including the disaster stricken region.
